

LUBRIN®

VAGINAL LUBRICATING INSERTS

Lubrin® Inserts are specifically formulated and designed to provide lubrication for vaginal dryness.

Because a Lubrin® Insert liquefies within the vagina, it can be conveniently and discreetly inserted to simulate your body's own natural lubrication.

Lubrin® Inserts are easy to use, unscented, colorless, nonstaining and water soluble.

INGREDIENTS: PEG-6-32, PEG-20, Caprylic/Capric Triglyceride, Glycerin, PEG-40 Stearate and Polysorbate-80.

IMPORTANT INFORMATION:

Lubrin® is not medicated, does not contain a spermicide, and is **NOT A CONTRACEPTIVE.**

FIGURE 1

DIRECTIONS:

- (1) Remove Lubrin® Insert from wrapper just prior to insertion.
To open wrapper: Using both hands, grasp each tab at the top of the insert and peel apart the wrapper.
- (2) Place one insert into the vagina using the index finger. If less lubrication is required, insert may be cut in half. (No special applicator is required.)

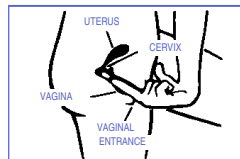

FIGURE 2

Lubrin® Inserts are designed to quickly liquefy, lubricating the walls of the vagina for several hours. When using for intercourse, Lubrin® should be inserted at least 5 minutes prior to intercourse to provide ample lubrication. IF IRRITATION OCCURS, DISCONTINUE USE.

Store Lubrin® Inserts at room temperature 15°-30°C (59°-86°F). Inserts may melt if exposed to extreme heat. If necessary, place inserts in refrigerator for 24 hours to resolidify. Melting and resolidifying will not alter the lubricating effect of Lubrin® Inserts.

KEEP OUT OF REACH OF CHILDREN

Lubrin® Inserts are individually sealed and available in packages of:

- 5 Vaginal Inserts List 0482-0118-19
- 12 Vaginal Inserts List 0482-0118-12
